16th Year of Excellence

Industry's Reference Point

SteelFab, the Middle East region's premier trade event, has been a crucial reference point for the region's steel fabrication and metal working industry for the past 15 years. It has served the industry through the highs and lows and patches that fall in between. Now, in its 16th edition, when the region is embracing the industrial revolution of today, Industry 4.0, SteelFab is in the forefront helping the sector adapt and evolve.

Heralding Tech Evolution

With Industry 4.0 being the buzz in the region, the metal working industry is increasingly being driven by interconnectedness of advanced technology, automation, robotics, and real-time data - the Internet of Things (IoT), offering substantial cost savings. SteelFab is not only taking the lead in bringing the latest technology but also helping local and regional fabrication units to get a close look at evolving technology.

Trusted Platform

For exhibitors, SteelFab is the only such event in the region that help them showcase latest and in-demand technology and equipment to a quality audience. The fact that more than half of the footfall are preregistered trade visitors is a clear indicator that the show attracts genuine footfall. The presence of over 700 brands, special focus areas, live displays, scores of sessions of technical seminars, and round-table discussions makes the show a comprehensive event for the industry.

Global Support

UCIMU SISTEMI PER PRODURRE - the Association of Italian Manufacturers of Machine Tools, Robots, Automation Systems and ancillary products

DVS & AUMA - German Pavilion

MESSE ESSEN - Essen Welding & Cutting Pavilion

UK PAVILION

TAMI - Taiwan Association of Machinery Industry

(ITA) - International Tube Association

A Glimpse Into Past Show

Total Direct Exhibitors:
251

International Exhibitors:
168

Domestic Exhibitors:
84

Space Occupied:
19,000
Sq M (Gross)

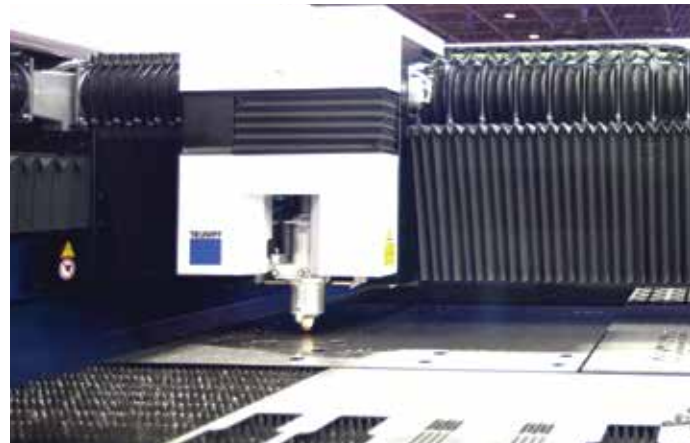

Trade Visitors:
8,000 (Average)
(From 69 Countries)

CONCURRENT VERTICAL:
5th Fasteners World Middle East

SPECIAL FOCUS AREAS: Welding & Cutting, Machine Tools, Tube & Pipe and Wear Resistance

NATIONAL PAVILIONS:

UK, Italy, China, India, Taiwan and Turkey, in addition to the Essen Welding & Cutting Pavilion

A Resurgent Market

Strong resurgence in the GCC's economic growth prospects is fuelling growth of the region. Construction remains the biggest sector by project value, while infrastructure and industries are the core sectors that are demand drivers of the metal working industry in the region. Crude prices have already hit the year's high; and the UAE, along with Oman, is set to be the fastest growing economy in the GCC region this year. Continuing infrastructure spending, stimulus packages, reforms, and growth in non-oil sector are also providing an impetus to the industry.

The Big Picture

- US\$1.8tn, the value of projects in the construction and oil and gas industries, which account for about 58% of all projects planned or underway in the GCC
- US\$ 80 bn worth of water, wastewater projects under way across GCC
- US\$ 864 bn, the value of construction projects in Saudi Arabia, the biggest construction market in the region; the UAE comes second with US\$575.9bn
- US\$ 664 bn worth of oil, gas and petrochemicals projects planned or underway across the MENA region, with an estimated US\$ 396 bn worth of projects planned or unawarded
- US\$ 30 bn major power project contracts awarded every year across the GCC
- US\$ 200 billion railway network will link all GCC countries and is on course to meet its 2021 target

Special Focus Segments

SteelFab features a series of special focus areas that make it the most comprehensive and dedicated show of its kind in the region. They include Power Tools, Welding & Cutting, Machine Tools and Tube & Pipe.

Power Tools

Power tools is a very important part of the fabrication industry where every person involved in this industry uses these tools both in their work yard or on site work for assembling, fixing repairing etc. SteelFab brings together the Fabricators, MEP contractors, Oil & Gas Contractors, Marine & Offshore Contractors, Civil & engineering personnel on one single platform . The special Segment on Power Tools guarantees attendance from more than 8000 visitors where each and every visitor is a potential buyer for Power Tools.

Welding & Cutting

Right from oxyfuel, plasma and laser cutting systems to special machines and equipment for welding, cutting, brazing, soldering and heating, you can display all your welding and cutting products and services here. You can expect ready takers from the region's core industries. Rising construction and manufacturing activity, growth in automobile and construction industry, increasing demand for energy and the emergence of friction stir welding technology are the key factors fuelling the demand growth.

Machine Tools

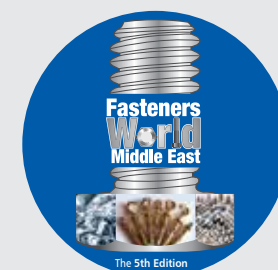

With a rapidly growing industrial manufacturing sector, the consumption of machine tools in the country and the region is exceptionally high. Besides, with reduced manual intervention in process control using machine tool control system and smart tooling being the key to optimise cost, reduce scrap and improved machine utilisation, the demand is constantly on the rise from segments like industrial units, automotive, chemicals, aerospace, food processing precision engineering and transportation etc.

Tube & Pipe

The growth in demand for pipes and tubes can be directly attributed to the rising demand from the oil & gas, petrochemical, construction and automotive industries. The region's bread-and-butter, oil & gas industry is the dominant end-user of pipes and tubes, and therefore, the growth in oil & gas production is the major driving factor for the market. A big chunk of all seamless tubes and pipes are used for oil country tubular goods, topside process pipes, riser pipes, subsea flowlines, and heat exchanger tubes or instrumentation tubes, among others.

Driven By Tech

The regional metal working and steel fabrication industry is known for its proficiency in precision manufacturing and optimal designs, requiring high-end machinery and equipment in order to be on the top of the game all the time. They have the expertise, experience, design, production and material capabilities, quality and consistency. With nearly all aspects of innovation revolving around the evolution of the equipment and tools at use, they are constantly on the lookout for latest technology and products.

5th FASTENERS WORLD MIDDLE EAST

The 5th Fasteners World ME will be a concurrent event at SteelFab presenting latest technological developments as well as conventional systems from all areas of the industry. With market developing dynamically over the past few years due to the onslaught of new technologies and fields of application as well as the use of various new materials, the concurrent vertical will be a boon for manufacturers and distributors of fasteners and fixers to tap into the regional market.
