FLEXIBLE ROLL FORMING SYSTEMS

 Gasparini S.p.A. is leading European company producing hi-tech machinery for the metal processing industry, specialized in roll forming line for working of thicknesses from 0.2 up to 12 mm.

The solutions generated by Gasparini allow the production of lines that for their technical characteristics innovate the traditional sheet metal working processes, bringing to the users great advantages in quality, productivity and flexibility.

 Gasparini S.p.A. ist eins der führenden europäischen Unternehmen im Bereich der Herstellung von Hi-Tech-Anlagen für die metallverarbeitende Industrie, spezialisiert für Walzprofilier-Linie für die Blechstärken von 0,2 bis 12 mm.

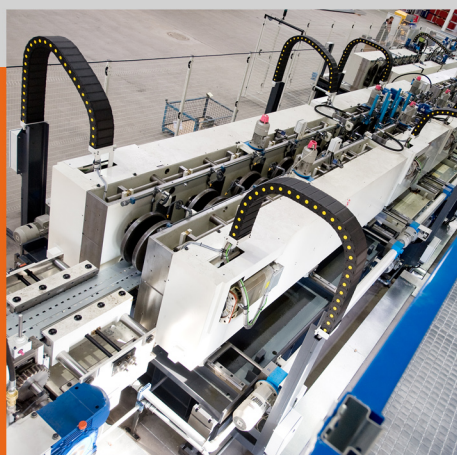

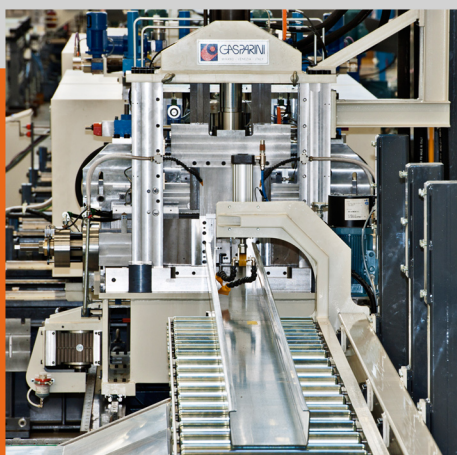

Die Gasparini Lösungen ermöglichen die Herstellung von Linien, die in ihren technischen Merkmalen gegenüber den traditionellen Blechbearbeitungsprozessen und dem Anwender große Vorteile in Qualität, Produktivität und Flexibilität bieten.

 Gasparini S.p.A. est une entreprise européenne leader dans la production des lignes Hi-Tech pour le travail de la tôle. Le cœur de son activité sont les lignes de profilage, pour épaisseurs de la tôle entre 0,2 et 12 mm.

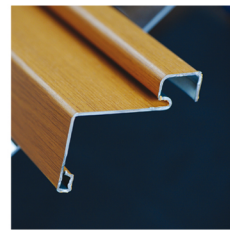

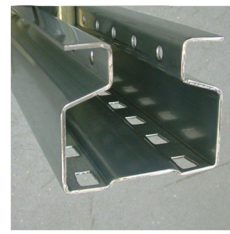

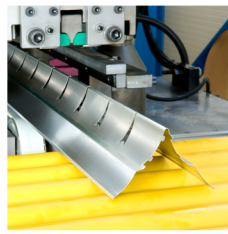

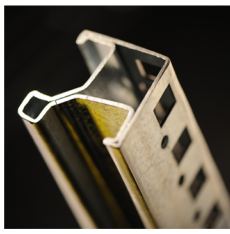

Les solutions développées chez Gasparini permettent la conception et la réalisation de lignes très innovantes par rapport au travail de la tôle traditionnel, en permettant à ses utilisateurs des grands avantages en terme de qualité, productivité et flexibilité.

 Gasparini S.p.A. è leader in Europa nella produzione di macchinari hi-tech per l'industria della lavorazione dei metalli, specializzata in linee di profilatura per la lavorazione di spessori da 0,2 fino a 12 mm.

Le soluzioni ideate dalla Gasparini portano alla realizzazione di impianti innovativi per la lavorazione della lamiera, portando vantaggi ai propri clienti in termini di qualità produttività e flessibilità.

FLEXIBLE ROLL FORMING SYSTEMS

 Roll forming is the heart of our machines. Our highly flexible lines integrate all ancillary technologies useful to obtain the complete product:

- Notching
- Punching
- Clinching
- Welding
- Bending
- Folding
- Cutting
- Discharging
- Handling
- Packaging

 Walzprofilieren ist das Herz unserer Maschinen. Unsere hochflexiblen Anlagen integrieren sinnvoll alle ergänzenden erforderlichen Technologien:

- Ausklinken
- Stanzen
- Clinchen
- Schweißen
- Biegen
- Falten
- Schneiden
- Entladen
- Teile-Handhabung
- Verpackung

 Le profilage est le cœur de nos machines. Nos lignes de profilage intègrent toutes les technologies auxiliaires nécessaires pour l'obtention du produit terminé :

- Grugeage
- Poinçonnage
- Clinching
- Soudure
- Courvure
- Pliage
- Coupe
- Déchargement
- Manipulation
- Emballage

 La profilatura è il cuore dei nostri impianti. Le nostre linee altamente flessibili sono dotate di tutte le tecnologie integrate per ottenere il prodotto completo:

- Scantonatura
- Punzonatura
- Clinciatura
- Saldatura
- Curvatura
- Piegatura
- Taglio
- Scarico
- Manipolazione
- Imballaggio
